Topic

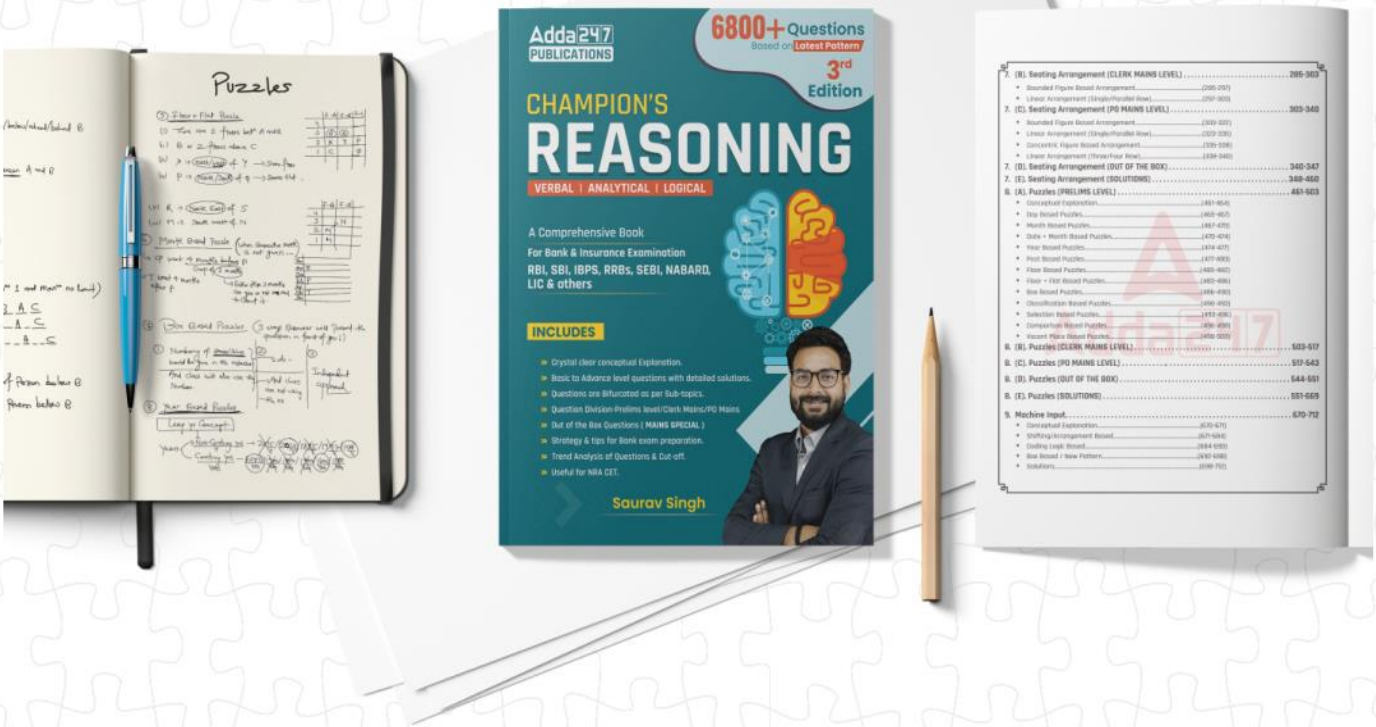
RRB Clerk Mains

BY SAURAV SINGH

CHAMPION'S REASONING 3.0

THIS BOOK INCLUDES

- Crystal clear conceptual Explanation.
- Questions are Bifurcated as per Subtopics.
- Question Division-Prelims Level/Clerk Mains/PO Mains
- Basic to Advance level questions with detailed solutions.
- Strategy & tips for Bank exam preparation.
- Trend Analysis of Questions & Cut-off.
- Out of the Box Questions.



This Book Is Helpful For Both **Prelims** As Well As Your **Mains** Exam Preparation.

A MESSAGE TO STUDENTS

Champions! The Most Crucial Months Are Here…
The upcoming months are going to decide the future of every banking aspirant. With **IBPS Clerk & SBI Clerk (Prelims & Mains) both the phases, IBPS/SBI PO (Mains) phase and of course other major bank exams** are also lined up, this is the time to give your **best shot**.

And we know that, Practice is the bridge between preparation and success.
It is not enough to just learn concepts—you must repeatedly apply them under pressure. Every practice session builds your **speed, accuracy, and presence of mind**, while also reducing exam-day anxiety. Just like a player sharpens skills through daily training before the big match, a banking aspirant must sharpen reasoning, quant, and English through **relentless and structured practice**. The more you practice, the more familiar patterns become, and the more confident you feel when facing new challenges in the exam hall.
Remember: –
📌 *Knowledge* can get you started, but only **consistent practice** turns you into a real achiever.
📌 Practice is not just solving questions, it's about building **speed, accuracy, and confidence**.
📌 Every hour of smart practice today becomes a **step closer to your selection** tomorrow.

And to make your practice even more result-oriented, I'm introducing three powerful add-ons in your updated Rank File:
1️⃣ **Time-Based Miscellaneous Bundled Set –** Carefully designed mixed-topic sets with a timer to replicate real exam pressure, training you to think fast and act smart.
2️⃣ **Timer in Seating + Puzzle File –** Every seating arrangement and puzzle now comes with a built-in timer, ensuring you sharpen your speed, accuracy, and decision-making just like in the actual exam.
3️⃣ **3 Days Mains Files –** Special mains-oriented practice files every 3 days to help you cope with the upcoming PO Mains exam with consistency and confidence.

🎯 Champions, this is not just an update, it's your **weapon to beat the cut-off and secure your seat**. Now it's your turn—make every practice count! 🚀

All The Best Champions
Blessings

Directions (1-5): Read the following information's carefully and answer the questions given below.

Sixteen seats are around a regular octagonal shaped table such that there is one seat at each corner of the table and one seat at the middle of each side of the table. Twelve persons J, K, L, M, N, O, P, Q, R, S, T and U sit on twelve of these seats and four seats are vacant. Each of them faces towards the centre. Some of the persons who sit on these seats have different cars among BMW, Creta, Verna, and Ferrari. At least two persons sit between any two vacant seats.

Note:

I. If there are one/two/three persons sit between X and Y, then there may or may not be any vacant seat until or unless stated otherwise.

II. If X sits immediate/second/third/and so on to the left/right of Y, then there may or may not be any vacant seat until or unless stated otherwise.

III. The person, who has car, does not sit adjacent to any vacant seat.

J's seat is fifth to the left of the one, who has BMW. Only three persons sit between J and T (from either of the sides) . T neither sits at the side of the table nor has a car. The one, who has Verna, is an immediate neighbour of T. Only two seats are between N and the one, who has Verna. The seat which is immediate right of N is vacant. U, who has Creta, sits at the side of the table. Only two persons sit between the one, who has Ferrari and U. M sits on fourth seat to the right of K, who is an immediate neighbour the one, who has Ferrari. M does not have any car. Only one person sits between L and O, when counted from the right of O. No one sits between Q and L. Neither Q nor S has Verna. Only two persons sit between P and R, when counted from the right of R.

1. Who among the following sits on fifth seat to the right of the one, who has Ferrari?

(a) The one, who has BMW
(b) S
(c) N
(d) The one, who has Creta
(e) M

2. How many persons sit between T and the one, who has Creta, when counted from the left of the one, who has Creta?

(a) Six (b) Three
(c) Four (d) Five
(e) Cannot be determined

3. Who among the following has Verna?

(a) The one, who sits on the seat which is immediate right of P
(b) O
(c) The one, who sits on third seat to the left of L
(d) The one, who sits fifth on fifth seat to the left of K
(e) All of the above

4. ____ sits adjacent to vacant seat and ____ does not sit adjacent to vacant seat.

I. P, J
II. O, T
III. L, S

(a) Only I and II (b) Only III
(c) Only II and III (d) Only I and III
(e) Only II

5. Which among the following option(s) is/are true?

(a) K sits on second seat to the left of J.
(b) No one sits between P and N, when counted from the right of N.
(c) S has BMW and sits second to the right of M's seat.
(d) Only options 'A' and 'B'
(e) All options 'A', 'B' and 'C'

Directions (6-8): Read the following information's carefully and answer the questions given below.

In every question some rows are given and to find out the resultant of a particular row you need to follow the following steps:

Step 1: If a number is followed by any perfect square number, then the resultant will be the absolute difference of two numbers.

Step 2: If an even number is followed by not a perfect square number which is divisible by 3, then the resultant will be the smaller number.

Step 3: If an even number is followed by not a perfect square number which is not divisible by 3, then the resultant will be the addition of two numbers.

Step 4: If an odd number is followed by not a perfect square number which is divisible by 3, then the resultant will be the addition of the larger number and 15.

Step 5: If an odd number is followed by not a perfect square number which is not divisible by 3, then the resultant will be the product of both the numbers.

FOR RBI, SBI, IBPS, LIC, NABARD & OTHER BANK/INSURANCE EXAMS
SUBSCRIBE Champion's Reasoning YouTube Channel

The steps are to be applied in precedence such that if more than one step is applicable to a number then the step which occurs first is given precedence.

6. Find the resultant of second row if (X+2) is the sum of resultant of first row and third row.

Row I	20	25	13
Row II	21	27	X
Row III	12	15	22

(a) 122 (b) 139
(c) 119 (d) 100
(e) 129

7. Find the absolute difference of the resultant of first and second row if (A X 3) is the resultant of second row.

Row I	16	18	A	21
Row II	11	4	81	45

(a) 13 (b) 21
(c) 9 (d) 15
(e) 12

8. Find the product of resultant of first row and sum of the resultant of the second and third row.

Row I	5	9	14	6
Row II	13	14	19	21
Row III	17	4	6	9

(a) 1410 (b) 1225
(c) 1445 (d) 1450
(e) 1325

Directions (9-10): Read the following information's carefully and answer the questions given below.

A & B means A is smaller than B
A * B means A is not smaller than B
A % B means A is not greater than B
A © B means A is greater than B
A # B means A is neither greater nor smaller than B
In the following question the relationship between different elements is given in the statements followed by three conclusions I, II and III. Read the statements carefully and mark your answer accordingly.

9. Statements:
J & H # G % S % K # P © R * L # Z * N
Conclusions:
I. H % P
II. N © K
III. L & G
(a) Only conclusion I is true
(b) Only conclusion III is true
(c) Only conclusion II is true
(d) Only conclusions I and III are true
(e) All of the above conclusions are true

10. Statements:
D # F * R # M © O, M % U & S # N % Y
Conclusions:
I. N © F
II. Y © R
III. S % D
(a) Only conclusion I is true
(b) Either conclusion I or III and conclusion II is true
(c) Only conclusion II is true
(d) Only conclusions I and III are true
(e) All of the above conclusions are true

Directions (11-14): Read the following information's carefully and answer the questions given below.

A number-word arrangement machine when given an input rearranges them following a particular rule in each step. The following is an illustration of input and rearrangement.
Input: magical 2389 colourful 4125 theatre 6742 graduate 8751 achieve 9751
Step I: natixao 32981 xooouiuuo 50325 gseagie 7654 tiawuage 9641 axsieee 8641
Step II: aainotx 248 iooooouuux 478 aeeggis 761 aaegituw 963 aeeeisx 863
Step III: inotx 64 ix 224 ais 42 egituw 162 aisx 144
Step IV: ix 42 ais 64 aisx 144 inotx 162 egituw 224
Step V: 40 61 140 157 218
Step V is the last step of the above input. As per rules followed in the above steps, find out in each of the given questions the appropriate steps for the given input.
Input: 'difficulty 7563 feature 3677 markets 4386 beyond 2568 pressure 6316'

SUBSCRIBE Champion's Reasoning YouTube Channel

11. What is the third step of the given input?
(a) bgowx 144 agi 28 aeghinp 108 bemowy 48 ku 112
(b) bgowx 144 agi 28 aeghinp 108 bemowy 48 ku 192
(c) bgowx 134 agi 28 aeghinp 108 bemowy 48 ku 192
(d) bgowx 144 agi 28 aehinp 108 bemowy 48 ku 192
(e) bgowx 144 agi 28 aeghinp 118 bemowy 48 ku 192

12. Which among the following option(s) is/are not true?
(a) In step II, vowels appear more than 15 times.
(b) In step III, there is no odd number.
(c) In step IV, 'm' is the 11th letter from the right end.
(d) In step II, the number of even numbers are more than the number of odd numbers.
(e) None of the above

13. What is the absolute difference between the second highest number and second lowest number obtained in step V?
(a) 81 (b) 47
(c) 51 (d) 83
(e) 93

14. What is the step IV of the give input?
(a) ku 28 agi 48 bgoux 108 bemowy 144 aeghinp 192
(b) ku 18 agi 48 bgowx 108 bemowy 144 aeghinp 192
(c) ku 18 agi 48 bgowx 108 bemoy 144 aeghinp 192
(d) ku 28 agi 48 bgowx 118 bemowy 144 aeghinp 192
(e) ku 28 agi 48 bgowx 108 bemowy 144 aeghinp 192

15. If in the word 'COMMUNICATIONS' from the left end, all the letters which are at odd position are changed to the immediate preceding letter and all the letters that are at even position changed to 3rd succeeding letter as per the English alphabetical order then, all the letters are arranged as per the English alphabetical order from left to right, then how many letters are there between the fourth letter from the left end and seventh letter from the right end as per the English alphabetical series after the rearrangement?
(a) Six (b) Seven
(c) Nine (d) Eight
(e) None of the above

Directions (16-18): Read the following information's carefully and answer the questions given below.

Seven airlines Indigo, Jet Airways, Air India, Spice Jet, Star, Akasa, and Vistara flights are scheduled for departure from IGI Airport New Delhi on a certain day for a different city among Patna, Gaya, Ranchi, Bokaro, Purnea, Kolkata, and Bhopal however not necessarily in the same order. Each flight is scheduled at a different time among 9:30 am, 12:00 pm, 2:30 pm, 3:30 pm, 4:30 pm, 5:00 pm, and 6:00 pm however not necessarily in the same order.

Air India's flight is scheduled 150 minutes after Star's flight. As many flights are scheduled between Air India's flight and Star's flight as after Vistara's flight. Only two flights are scheduled between Vistara's flight and the flight, which is scheduled for Patna. The flight, which is scheduled for Purnea, is schedule for before the flight, which is scheduled for Patna. Neither Star's flight nor Air India's flight is scheduled for Purnea. Jet Airways's flight is scheduled 1 hour after the flight, which is scheduled for Gaya. The flight, which is scheduled for Bhopal, is scheduled immediately after Akasa's flight. Only one flight is scheduled between the flight, which is scheduled for Bhopal and Indigo's flight. Spice Jet's flight is neither scheduled for Purnea nor Ranchi. The flight, which is scheduled for Kolkata is scheduled after the flight, which is scheduled for Ranchi.

16. Akasa's flight is scheduled ____ before the flight, which is scheduled for ____.
(a) 210 minutes, Bokaro
(b) 60 minutes, Bhopal
(c) 30 minutes, Gaya
(d) 120 minutes, Purnea
(e) 180 minutes, Ranchi

17. Which of the following statements is definitely false?
(a) Only one flight is scheduled before Akasa's flight.
(b) Spice Jet's flight is scheduled for Bokaro.
(c) Air India's flight is scheduled before the flight, which is scheduled for Kolkata.
(d) Indigo's flight is scheduled for Purnea.
(e) Star's flight is not scheduled for Bhopal.

FOR RBI, SBI, IBPS, LIC, NABARD & OTHER BANK/INSURANCE EXAMS
SUBSCRIBE Champion's Reasoning YouTube Channel

18. Which of the following combinations of 'flight - city' is definitely correct?
(a) Akasa's flight - Purnea
(b) Air India's flight - Bokaro
(c) Vistara's flight - Ranchi
(d) Jet Airways's flight - Bhopal
(e) Indigo's flight - Kolkata

Directions (19-22): Read the following information's carefully and answer the questions given below.

Twelve persons A, B, C, D, E, F, G, H, I, J, K, and L belong to a family of three generations. No single person in the family is parent. There is at least one married couple in each generation. All the persons sit in three parallel rows- Row I, Row II, and Row III such that four persons sit in each row and face towards north direction. Row I is in north of Row II, which is in north of Row III. The persons, who sit at extreme left end of Row I sit opposite to persons, who sit at extreme left end of Row II and Row III and vice-versa. Similarly, the persons, who sit at extreme left end of Row II sit opposite to persons, who sit at extreme left end of Row I and Row III and vice-versa. The distance between any two adjacent persons all the row is same. Married couples must sit in the same row.

Note:

I) If it is given that 'X' sits immediate/second to the left/right of 'Y', then both X and Y sit in the same row.

II) If it is given that 'X' sits north of 'Y' and 'Y' sits in Row III, then 'X' sits at any of the positions in Row I or Row II.

III) If it is given that 'X' sits south of 'Y' and 'Y' sits in Row I, then 'X' sits at any of the positions in Row II or Row III.

D sits second to the left of E, who is father of L. L sits south of D, who is only child of B. D doesn't sit in Row II. L's spouse sits at extreme right end of one of the rows. A, who is son of D sits second to the left of L's spouse. As many persons sit to the right of A as to the right of A's father. J, who is brother-in-law of B sits immediate right of B. J is father-in-law of E's spouse. Only one person sits to the left of J's spouse, who sits in north of A. K is daughter of C. K doesn't belong to third generation. As many persons sit to the left of K as to the left of F, who is neither married to B nor D. H, who has at least one son sits in south of I. H has at least one sibling. As many persons sit to the left of G as to the right of I. Gender of B and G is same as I.

19. How is G related to the one, who sits at extreme right end of Row I?
(a) Son-in-law (b) Wife
(c) Husband (d) Son
(e) Daughter-in-law

20. ____ is married to ____, who sits immediate ___ of B.
(a) J, H, left (b) J, C, left
(c) J, H, right (d) H, C, left
(e) G, H, right

21. Four of the given five pair of persons are alike in a certain manner and thus form a group. Choose the one, which does not belong to the same group.
(a) H and B (b) D and I
(c) J and C (d) L and G
(e) K and G

22. Which of the following persons sit in Row III?
(a) H's son (b) B's daughter-in-law
(c) J's son (d) K
(e) All of the above

Directions (23-25): Read the following information's carefully and answer the questions given below.

Eight persons P, Q, R, S, T, U, V and W have different weights.

'n + A' means at least 'n' persons are heavier than A, where 'n' is 1, 2, 3 and so on.

'A % B' means A is heavier than B.

'A # B' means A is lighter than B.

'A ≠ B' means A is not heavier than B.

'A @ B' means A is not lighter than B.

Given: 3 + Q; Q @ P; W # P; Q % V; V % W; U ≠ R; S # T; S @ Q

W is not the lightest person. T is not the heaviest person. More than one person has weight between V and S.

23. Which of the following expression(s) is/are definitely correct?
I. U ≠ W
II. 4 + V
III. R % T
(a) Only III (b) Only I and III
(c) Only II and III (d) Only I and II
(e) All I, II, and III

FOR RBI, SBI, IBPS, LIC, NABARD & OTHER BANK/INSURANCE EXAMS
SUBSCRIBE Champion's Reasoning YouTube Channel

24. If the weight of heaviest person, 3rd heaviest person and 4th heaviest person is 90kg, 80kg and 72kg respectively; then which is of the following cannot be a possible value for sum of T's weight and Q's weight?

(a) 153kg (b) 158kg
(c) 156kg (d) 161kg
(e) 163kg

25. Which of the following statements is definitely correct?

(a) T is heavier than R
(b) More than four persons are heavier than Q
(c) V is lighter than U
(d) U is the lightest person
(e) S is not lighter than R

26. In the question given below, a passage/statement is given followed by statements which may or may not strengthen/weaken the assertion made in the passage. Answer the questions as per the individual direction given.

A decade-long study on migratory birds in the Arctic tundra has revealed that several species have altered their breeding schedules to align with earlier snowmelts. Ecologists suggest this is evidence of adaptive evolution in response to climate change, as the birds are adjusting genetically to ensure better survival of their offspring. However, a few ornithologists claim the observed change is a short-term behavioural adaptation rather than a long-term evolutionary shift.

Which of the following, if true, most strongly STRENGTHENS the ecologists' claim?

(a) Genetic sequencing of these bird populations shows mutations in genes linked to circadian and breeding cycles over successive generations.
(b) The same species in lower latitudes have shown no change in their breeding behaviour despite similar temperature increases.
(c) The change in breeding schedule coincided with increased availability of food resources due to warmer temperatures.
(d) Artificial relocation of some birds to cooler regions resulted in no change in their breeding pattern.
(e) The altered breeding pattern was observed only in one breeding season, after which birds returned to their earlier pattern.

27. In the question given below, a passage/statement is given followed by statements which may or may not strengthen/weaken the assertion made in the passage. Answer the questions as per the individual direction given.

A new report by agricultural scientists claims that the introduction of drone-based pesticide spraying in Punjab has significantly reduced pesticide usage and improved crop yields. Critics, however, argue that these drones are used primarily on larger farms, so the yield increase might stem from better farm management rather than the technology itself.

Which of the following, if true, most STRENGTHENS the report's claim?

(a) Some large farmers report mixed results with drone-based spraying.
(b) The total cultivated area in Punjab has expanded during the same period.
(c) Government subsidies for fertilizers and seeds have also increased over the last few years.
(d) Data shows small and medium farms using drones have also reported similar yield increases despite limited access to other resources.
(e) Similar yield increases were recorded in neighbouring states that did not adopt drone technology.

28. In the question given below, a passage/statement is given followed by statements which may or may not strengthen/weaken the assertion made in the passage. Answer the questions as per the individual direction given.

A new drug trial suggests that patients taking Drug X for hypertension showed lower blood pressure readings compared to those not on medication. Researchers claim Drug X is responsible for the improvement.

Which of the following, if true, most WEAKENS this conclusion?

Reasoning By Saurav Sir

FOR RBI, SBI, IBPS, LIC, NABARD & OTHER BANK/INSURANCE EXAMS
SUBSCRIBE Champion's Reasoning YouTube Channel

(a) Participants taking Drug X were also following a low-sodium diet and regular exercise routine as part of the study.
(b) The drug was administered in controlled doses over eight weeks.
(c) Patients in the control group were given a placebo.
(d) Some participants experienced mild side effects from the drug.
(e) Average cholesterol levels also declined in the treatment group.

29. In the question given below, a passage/statement is given followed by statements which may or may not strengthen/weaken the assertion made in the passage. Answer the questions as per the individual direction given.

A city mayor announced that the installation of LED streetlights has significantly reduced the municipality's electricity bills. The mayor concluded that this demonstrates the financial success of the energy-efficiency initiative.

Which of the following, if true, DO NOT WEAKEN the mayor's conclusion?

(a) The city replaced faulty wiring networks simultaneously with the LED installation.
(b) Other municipalities that installed LEDs also reported similar cost savings.
(c) The cost of electricity per unit decreased during the same period.
(d) The city's total streetlight usage hours were reduced due to new time-based lighting schedules.
(e) None of the above

30. In the question given below, a passage is given followed by statements which may or may not be inferred from the passage. Select the correct combination of statements that can be inferred.

Following the COVID-19 pandemic, the number of digital consultations in India rose exponentially, with telemedicine platforms reporting a surge in first-time users from rural areas. This shift has been aided by the government's eSanjeevani initiative and improved internet connectivity under BharatNet. However, the digital health boom has also raised concerns about data privacy, quality of medical advice, and accessibility for non-tech-savvy populations. Experts warn that unless regulation catches up, this growth could lead to uneven healthcare outcomes between urban and rural India.

I. The use of digital healthcare services increased significantly during the pandemic.
II. Rural India's participation in telemedicine grew largely due to better connectivity.
III. The digital health revolution has completely eliminated urban-rural disparities in healthcare.

(a) Only I
(b) Only I and II
(c) Only II and III
(d) Only I and III
(e) All I, II, and III

Reasoning By Saurav Sir

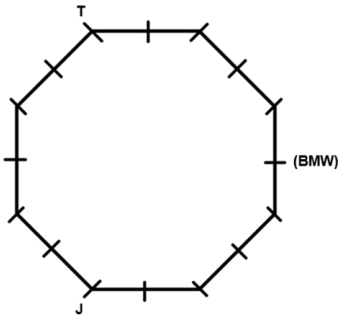
Solutions

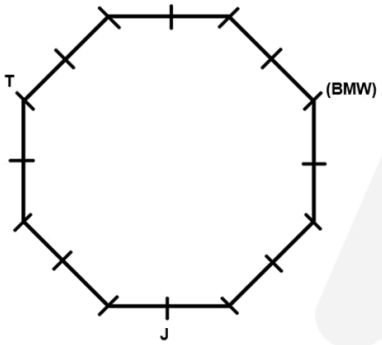
Solutions (1-5)

1) J's seat is fifth to the left of the one, who has BMW.
2) Only three persons sit between J and T (from either of the sides) .
3) T neither sit at the side of the table nor has a car.

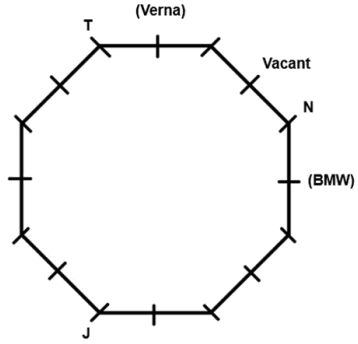
From clue 1, we place J fifth to the left of the one, who has BMW.
From clue 2, we get three, four or five seats are between J and T.
From clue 3, we get T sits either fifth to the left or sixth to the left of J. When J sits at the corner and T's seat is fourth to the left/right of J, as we know at least two persons sit between two vacant seats, so we cannot place all the vacant seat in this case. When T's seat is fourth to the left of J's seat, we cannot place all the vacant seat in this case. So, we have two possible cases.
Case 1: When J sits at the corner.



Case 2: When J sits at the side of the table.

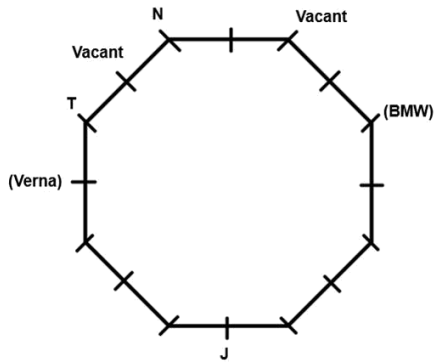


From clue 1, in case 1, the persons who sits immediate left of T has Verna. In case 2, the person who sits immediate right or immediate left T has Verna.
From clues 2 and 3, in case 1, N's seat is third to the left of the person who has Verna and the seat which is immediate right of N is vacant. In case 2, when the person who sits immediate left of T has Verna, then we get N's seat is either third to the left or third to the right of the one, who has Verna, now we know that the seat adjacent to the person who has car is not Vacant, so in this case we cannot place all four vacant seats, so this case gets eliminated. In case 2, the one, who has Verna sits immediate right of T, now the seat which is immediate left of T is vacant and N sits second to the left of T.
Case 1: When J sits at the corner.



FOR RBI, SBI, IBPS, LIC, NABARD & OTHER BANK/INSURANCE EXAMS
SUBSCRIBE Champion's Reasoning YouTube Channel

Case 2: When J sits at the side of the table.

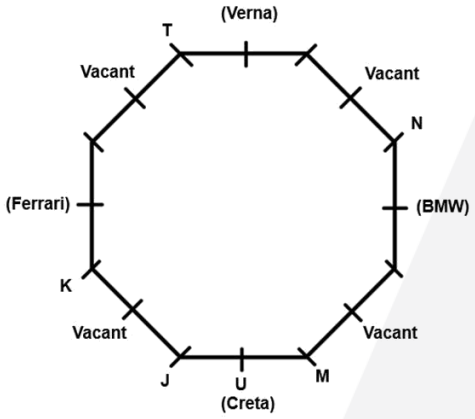


From clue 1, in case 1, U's seat is third to the left of J, immediate right of J or third to the right of J. In case 2, U's seat is immediate left of the one, who has BMW.

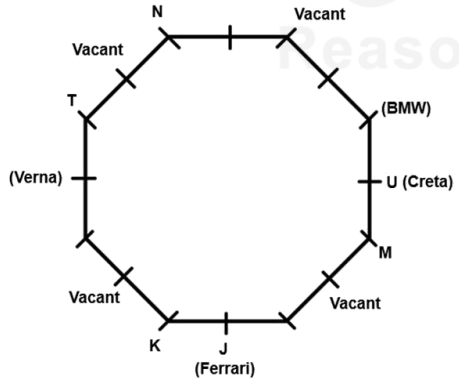
From clue 2, in case 1, the one, who has Ferrari sits either immediate right or third to the left of J's seat. In case 2, J has Ferrari.

From clue 3, in case 1, M's seat is second to the right of J's seat, thus U's seat is immediate right of J's seat and the one, who has Ferrari sits third to the left of J's seat. K's seat is immediate right of the one, who has Ferrari. In case 2, K's seat is immediate left of J and M's seat is immediate left of U.

Case 1: When J sits at the corner.



Case 2: When J sits at the side of the table.



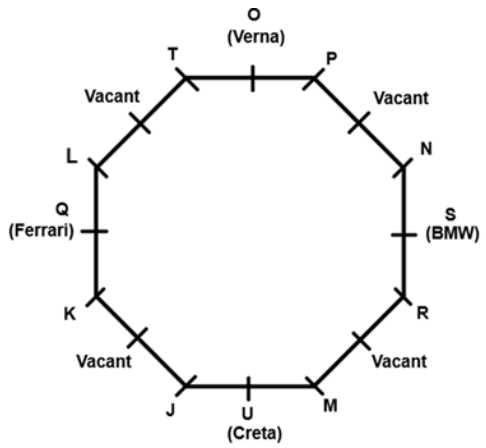
From clues 1 and 2, in case 1, O has Verna, L sits third to the right of O and Q has Ferrari. In case 2, O has BMW, L sits third to the right of O and Q sits immediate right of O.

From clues 2 and 3, in case 2, we cannot place as in this case S has Verna. In case 1, P's seat is second to the right of N's seat, R's seat is second to the right of M's seat and S has BMW.

Therefore, the final arrangement is as follows:

Reasoning By Saurav Sir

FOR RBI, SBI, IBPS, LIC, NABARD & OTHER BANK/INSURANCE EXAMS
SUBSCRIBE Champion's Reasoning YouTube Channel



1. (e) **2. (c)** **3. (e)** **4. (b)** **5. (d)**

Solutions (6-8)

6. (b)

In row 1,
According to step 1, 20 is followed by 25, which is a perfect square number, so we get (25 - 20) = 5
According to step 5, 5 is followed by 13, which is a not a perfect square number which is not divisible by 3, then we get (5 X 13) = 65
Resultant of row 1 = 65
In row 3,
According to step 2, 12 is followed by 15, a not a perfect square number which is divisible by 3, so the smaller number is 12.
According to step 3, 12 is followed by 22, a not a perfect square number which is not divisible by 3, so we get (12 + 22) = 34
So, Resultant of row 3 is 34.
So, sum of resultant of row 1 and row 3 = 65 + 34 = 99
X + 2 = 99
X = 99 - 2
X = 97
Now in row 2,
According to step 4, 21 is followed by 27, which is a not a perfect square number which is divisible by 3, so the larger number is 27, so we get = (27 + 15) = 42
According to step 3, 42 is followed by 97, which is a not a perfect square number which is not divisible by 3, so we get = (42 + 97) = 139
So, Resultant of row 2 is 139.
Hence, option b.

7. (c)

In row 2,
According to step 1, 11 is followed by 4, which is a perfect square number, so we get = (11 - 4) = 7
According to step 1, 7 is followed by 81, which is a perfect square number, so we get (81 - 7) = 74
According to step 2, 74 is followed by 45, which is a not a perfect square number which is divisible by 3, so the smaller number is 45, thus we get 45.
So, resultant of row 2 = 45
Thus, (A X 3) = 45
So, A = 15

FOR RBI, SBI, IBPS, LIC, NABARD & OTHER BANK/INSURANCE EXAMS
SUBSCRIBE Champion's Reasoning YouTube Channel

In row 1,
According to step 2, 16 is followed by 18, a not a perfect square number which is divisible by 3, then the smaller number is '16'.
According to step 2, 16 is followed by 15, which is a not a perfect square number which is divisible by 3, then the smaller number is '15'.
According to step 4, 15 is followed by 21, which is a not a perfect square number which is divisible by 3, so we get = (21 + 15) = 36
So, resultant of row 1 = 36
Therefore, the absolute difference of the resultant of first and second row = |36 - 45| = 9
Hence, option c.

8. (a)
In row 1,
According to step 1, 5 is followed by 9, which is a perfect square number, so we get (9 - 5) = 4
According to step 3, 4 is followed by 14, which is a not a perfect square number which is not divisible by 3, so we get (14 + 4) = 18
According to step 2, 18 is followed by 6, which is a not a perfect square number which is divisible by 3, so the smaller number is '6'.
So, resultant of row 1 is 6.
In row 2,
According to step 5, 13 is followed by 14, not a perfect square number which is not divisible by 3, then we get (13 X 14) = 182
According to step 3, 182 is followed by 19, which is a not a perfect square number which is not divisible by 3, so we get = (182 + 19) = 201
According to step 4, 201 is followed by 21, which is a not a perfect square number which is divisible by 3; the larger number is 201, so we get = (201 + 15) = 216.
So, resultant of row 2 = 216
In row 3,
According to step 1, 17 is followed by 4, which is a perfect square number, so we get = (17 - 4) = 13
According to step 4, 13 is followed by 6, which is a not a perfect square number which is divisible by 3, so we get (13 + 15) = 28
According to step 1, 28 is followed by 9, which is a perfect square number, so we get = 28 - 9 = 19
So, resultant of row 3 is '19'.
So, sum of resultant row 2 and row 3 is (216 + 19) = 235
Therefore, the product pf resultant of row 1 and sum of resultant of row 2 and row 3 is (235 X 6) = 1410
Hence, option a.

Solutions (9-10)

9. (a)
Given statements:
J & H # G % S % K # P © R * L # Z * N
After decoding the code, we get:
J < H = G ≤ S ≤ K = P > R ≥ L = Z ≥ N
Conclusions:
I. H % P means H ≤ P: True (As H = G ≤ S ≤ K = P, here P ≥ H)
II. N © K means N > K: False (As K = P > R ≥ L = Z ≥ N, here K > N)
III. L & G means L < G: False (As G ≤ S ≤ K = P > R ≥ L, here relation between L and G cannot be determined)
So, only conclusion I is true.
Hence, option a.

FOR RBI, SBI, IBPS, LIC, NABARD & OTHER BANK/INSURANCE EXAMS
SUBSCRIBE Champion's Reasoning YouTube Channel

10. (b)

Given statements:
D # F * R # M © O, M % U & S # N % Y
After decoding the code, we get:
D = F ≥ R = M > O, M ≤ U < S = N ≤ Y
On combing the above statements, we get:
D = F ≥ R = M > O, D = F ≥ R = M ≤ U < S = N ≤ Y
Conclusions:
I. N © F means N > F: False (As F ≥ R = M ≤ U < S = N, here relation between N and F cannot be determined)
II. Y © R means Y > R: True (As R = M ≤ U < S = N ≤ Y, here Y > R)
III. S % D means S ≤ D: False (As D = F ≥ R = M ≤ U < S, here relation between S and D cannot be determined)
Since, conclusion I and III form complimentary pairs.
Therefore, either conclusion I or II is true.
So, either conclusion I or III and conclusion II is true
Hence, option b.

Solutions (11-14)

The logic followed is as follows:
For step I to IV:
A: For numbers:
In step I, from left end take the square of 4th digit, for remaining digits add 1 to all the even digits and subtract 1 from all the odd digits.
In step II, absolute difference between the number formed from the first three digits from the left end and the number formed from the remaining digit from the left end.
In step III, product of digits of all the numbers is written.
In step IV, all the numbers are arranged in ascending order from left to right.
B: For words:
In step I, in each word all the consonant are changed to opposite letter as per English alphabetical series and vowels remain same.
In step II, in each word all the letters are arranged as per English alphabetical series from left to right.
In step III, remove all the letters which are repeated in the words.
In step IV, arrange all the letters as per the total number of letters in each word in increasing order from left to right.
For step V:
From the left end, pair the number and the letter cluster immediate left of it, then take the difference of number and the number of letters in each pair.
Input: difficulty 7563 feature 3677 markets 4386 beyond 2568 pressure 6316
Step I: wiuuixuogb 6479 ueaguie 27649 naipegh 52936 yebomw 34764 kiehhuie 72036
Step II: bgiiouuuwx 638 aeegiuu 227 aeghinp 493 bemowy 283 eehhiiku 684
Step III: bgowx 144 agi 28 aeghinp 108 bemowy 48 ku 192
Step IV: ku 28 agi 48 bgowx 108 bemowy 144 aeghinp 192
Step V: 26 45 103 138 185

11. (b) **12. (d)** **13. (e)** **14. (e)**

15. (d)

Given word: 'COMMUNICATIONS'.

1	2	3	4	5	6	7	8	9	10	11	12	13	14
C	O	M	M	U	N	I	C	A	T	I	O	N	S
-1	+3	-1	+3	-1	+3	-1	+3	-1	+3	-1	+3	-1	+3
B	R	L	P	T	Q	H	F	Z	W	H	R	M	V

After arranging all the letters as per the English alphabetical order from left to right, we get:

FOR RBI, SBI, IBPS, LIC, NABARD & OTHER BANK/INSURANCE EXAMS
SUBSCRIBE Champion's Reasoning YouTube Channel

'BFHHLMPQRRTVWZ'
The fourth letter from the left end is 'H'.
The seventh letter from the right end is 'Q'.
There are only eight letters ('I', 'J', 'K', 'L', 'M', 'N', 'O', 'and 'P') between 'H' and 'Q' as per the English alphabetical series.
Hence, option d.

Solutions (16-18)

Starting Point: Start with placing Star's flight, Air India's flight, and Vistara's flight to form least possible cases.
Clues:
1) Air India's flight is scheduled 150 minutes after Star's flight.
2) As many flight is scheduled between Air India's flight and Star's flight as after Vistara's flight.
3) Only two flights are scheduled between Vistara's flight and the flight, which is scheduled for Patna.
4) The flight, which is scheduled for Purnea is schedule for before the flight, which is scheduled for Patna. Neither Star's flight nor Air India's flight is scheduled for Purnea.
Inferences:
From clues 1 and 2, Star's flight is scheduled at 9:30 am, 12:00 pm, 2: 30 pm or 3:30 pm, Air India's flight is scheduled at 12:00 pm, 2:30 pm, 5:00 pm or 6:00 pm, and Vistara's flight is scheduled at either 4: 30 pm or 6:00 pm.
From clues 3 and 4, the flight, which is scheduled for Purnea is scheduled at either 9:30 am or 2:30 pm and the flight, which is scheduled for Patna is scheduled at either 12:00 pm or 3:30 pm. We have four possible cases.
Case 1: When Star's flight is scheduled at 9:30 am.

Flight Timings	Air Lines	Cities
9:30 am	Star	
12:00 pm	Air India	
2:30 pm		Purnea
3:30 pm		Patna
4:30 pm		
5:00 pm		
6:00 pm	Vistara	

Case 2: When Star's flight is scheduled at 12:00 pm.

Flight Timings	Air Lines	Cities
9:30 am		Purnea
12:00 pm	Star	
2:30 pm	Air India	
3:30 pm		Patna
4:30 pm		
5:00 pm		
6:00 pm	Vistara	

Case 3: When Star's flight is scheduled at 2:30 pm.

Flight Timings	Air Lines	Cities
9:30 am		Purnea
12:00 pm		Patna
2:30 pm	Star	
3:30 pm		
4:30 pm	Vistara	
5:00 pm	Air India	
6:00 pm		

Reasoning By Saurav Sir

FOR RBI, SBI, IBPS, LIC, NABARD & OTHER BANK/INSURANCE EXAMS

Case 4: When Star's flight is scheduled at 3:30 pm.

Flight Timings	Air Lines	Cities
9:30 am		Purnea
12:00 pm		Patna
2:30 pm		
3:30 pm	Star	
4:30 pm	Vistara	
5:00 pm		
6:00 pm	Air India	

From clue 1, case 1 and case 4 will be eliminated as we can't place Jet Airways's flight and the flight, which is scheduled for Gaya. In case 2, Air India's flight is scheduled for Gaya and Jet Airways's flight is scheduled for Patna. In case 3, either Star's flight or Air India's flight is scheduled for Gaya and Jet Airways's flight is scheduled at either 3:30 pm or 6:00 pm.

From clues 2 and 3, in case 2, Vistara's flight is scheduled for Bhopal, Indigo's flight is scheduled at 4:30 pm, Akasa's flight is scheduled at 5:00 pm. In case 3, Star's flight is scheduled for Bhopal, Indigo's flight is scheduled at 9:30 am, Akasa's flight is scheduled at 12:00 pm

From clues 4 and 5, case 2 will be eliminated as we can't place Spice Jet's flight. In case 3, Spice Jet's flight is scheduled at 3:30 pm for Bokaro, Vistara's flight is scheduled for Ranchi and Jet Airways's flight is scheduled for Kolkata.

The final arrangement is as follows:

Flight Timings	Air Lines	Cities
9:30 am	Indigo	Purnea
12:00 pm	Akasa	Patna
2:30 pm	Star	Bhopal
3:30 pm	Spice Jet	Bokaro
4:30 pm	Vistara	Ranchi
5:00 pm	Air India	Gaya
6:00 pm	Jet Airways	Kolkata

16. (a) **17. (e)** **18. (c)**

Reasoning By Saurav Sir

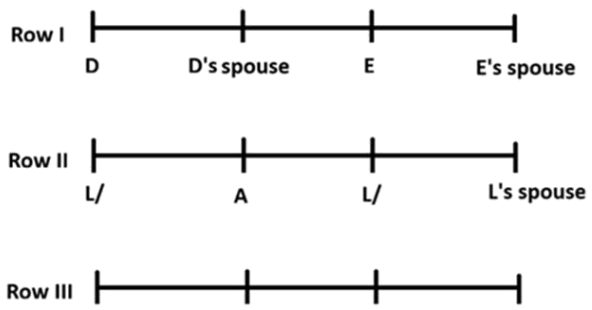
Solutions (19-22)

From clues 1, 2, and 3, Either D or E sit at extreme ends in Row I, as married couples must sit in the same row so, L and L's spouse sit either in Row II or Row III.

From clues 4 and 5, as married couples must sit in the same row so D is either mother or father of A, who sits either in Row II or Row III. We have four possible cases.

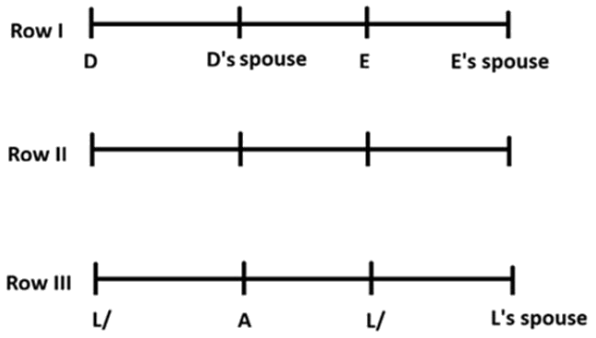
Case 1: When D sits at extreme left end of Row I.

Case 1.a: When L sits in Row II.

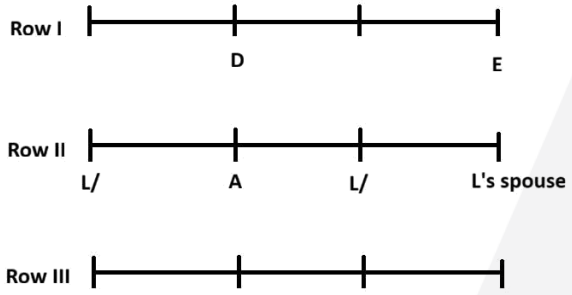


FOR RBI, SBI, IBPS, LIC, NABARD & OTHER BANK/INSURANCE EXAMS
SUBSCRIBE Champion's Reasoning YouTube Channel

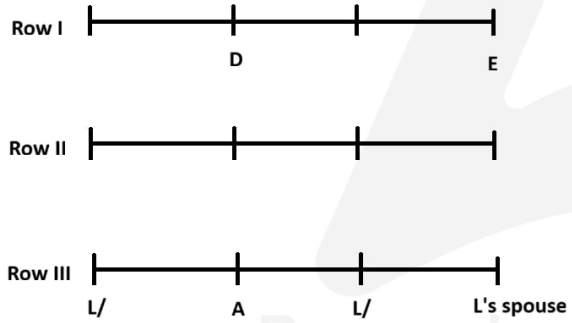
Case 1.b: When L sits in Row III.



Case 2: When E sits at extreme right end of Row I.
Case 2.a: When L sits in Row II.

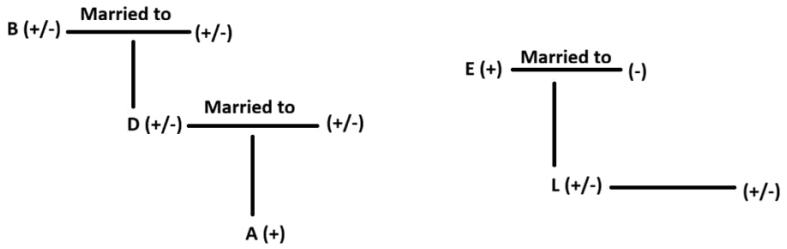


Case 2.b: When L sits in Row III.



Reasoning By Saurav Sir

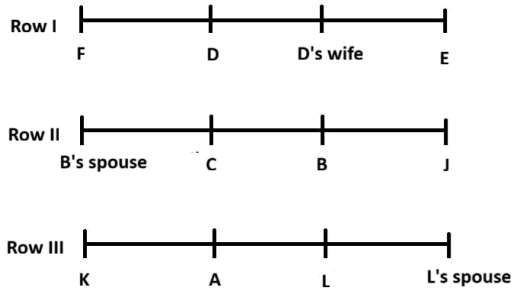
The family tree:



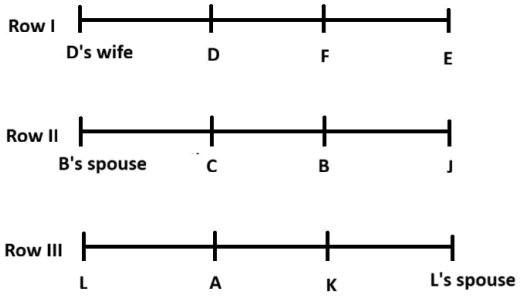
From clues 1 and 2, E is son of J and B is either brother-in-law or sister-in-law of J. Case 1.a and case 2.a will be eliminated as married couples sit in the same row so we can't place J, J's spouse and B in the same row. In case 1.b and case 2.b, B's spouse, J's spouse, B and J sit in Row II.
From clue 3, C is married to J and K is sister of E. In case 1.b and case 2.b, C sits immediate left of B in Row II and K must sit in Row III.
From clue 4, case 1.b will be eliminated as we can't place F as married couples sit in the same row, so we don't have slot available to place F. In case 2.b, D is father of A, F is wife of E and sits either immediate left or second to the right of D. K sits either immediate left or immediate right of A in Row III.

FOR RBI, SBI, IBPS, LIC, NABARD & OTHER BANK/INSURANCE EXAMS
SUBSCRIBE Champion's Reasoning YouTube Channel

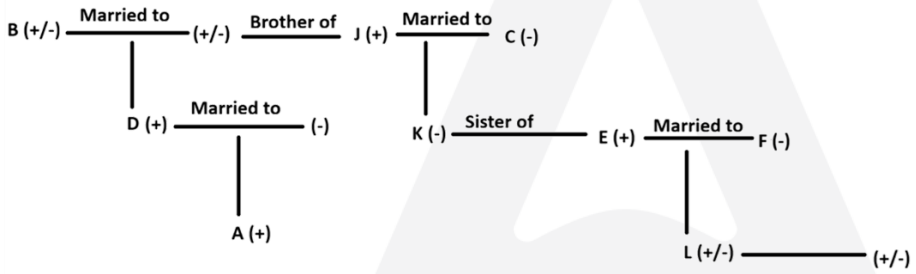
Case 2.b: When L sits in Row III.
Case 2.b.i: When K sits immediate left of A.



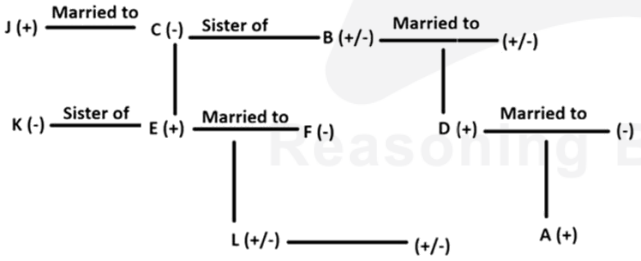
Case 2.b.ii: When K sits immediate right of A.



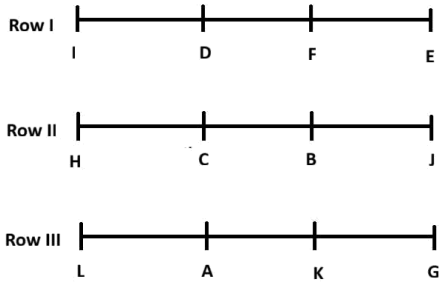
The family tree:
Case 1: J is sibling of B's spouse.



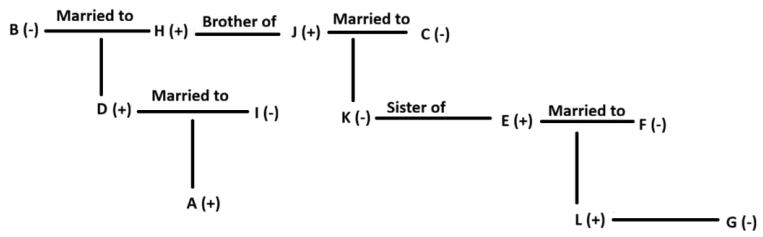
Case 2: J is married to B's sibling.



From clues 1 and 2, case 2.b.i will be eliminated as we can't place G and I. In case 2.b.ii, G sits immediate right of K, H sits immediate left of C and I sits immediate left of D. Also, as married couples sit in the same row, so I is wife of D, L is married to G and H is married to B.
From clue 3, Case 2 of the family tree is eliminated. B is wife of H and G is wife of L.
The final arrangement is as follows:



The final family tree is as follows:



19. (e) **20. (b)** **21. (e)** **22. (d)**

Solutions (23-25)

1) 3 + Q means at least three persons are heavier than Q.
2) Q @ P means Q is not lighter than P.
3) Q % V means Q is heavier than V.
4) V % W means V is heavier than W.
5) W # P means W is lighter than P. W is not the lightest person.

From clues 1 and 2, Q is heavier than P.

From clues 1, 3, 4, and 5, only three persons are heavier than Q. V is either heavier or lighter than P and W is the second lightest person. We have two possible cases.

Case 1: When P is heavier than V.

(Heaviest) ___ >____ >____ > Q > P > V > W > ___ (Lightest)

Case 2: When P is lighter than V.

(Heaviest) ___ >____ >____ > Q > V > P > W > ___ (Lightest)

From clue 1 and 2, T and S are 2nd heaviest and 3rd heaviest person respectively.

From clue 3, case 2 can be rejected.

From clue 4, U is lighter than R. Thus, U is the lightest person and R is the heaviest person.

The final arrangement is as follows:

(Heaviest) R > T > S > Q > P > V > W > U (Lightest)

23. (e) **24. (e)** **25. (d)**

26. (a)

The given paragraph talks about how a study on migratory birds in the Arctic tundra has shown that many species have evolved in response to climate change by altering their breeding schedules to align with earlier snowmelts. Direct genetic evidence of mutation linked to breeding cycles confirms that the change is evolutionary, not merely behavioural as claimed by the ornithologists. So, A most strongly supports the ecologists' claim. Thus, A is the right answer.

B, D and E undermine the ecologists' claim by implying limited or inconsistent adaptation, while C only explains correlation, not causation.

27. (d)

The given paragraph talks about a report by agricultural scientists that claims the drone-based pesticide spraying in Punjab has reduced pesticide usage and improved crop yields. This has been questioned by critics who claim that drones are used only on large farms. If even small and resource-limited farms benefit equally from drones, it shows the technology, not external factors. is driving improvement. So, D strongly supports the report's claim. Thus, D is the right answer.

A, B and C weaken the argument by introducing alternative explanations that could have contributed to the improvements, while E weakens the argument by showing how similar increases were found even in states that did not adopt the technology, suggesting that other factors might be at play.

FOR RBI, SBI, IBPS, LIC, NABARD & OTHER BANK/INSURANCE EXAMS
SUBSCRIBE Champion's Reasoning YouTube Channel

28. (a)

The given paragraph talks about how a new drug trial showed that patients taking Drug X for hypertension showed reduced blood pressure readings, which has led researchers to claim that the said drug is responsible for the improvement. If those taking Drug X also had dietary and lifestyle interventions, the observed improvement might result from these factors rather than the drug itself, thereby weakening the conclusion. Thus, A is the right answer.

B, C, D and E talk about separate details or findings from the trial, which are not related to the claim made by the researchers. They neither strengthen nor weaken the argument.

29. (b)

The given paragraph talks about how the installation of LED streetlights is claimed by a city mayor to have significantly reduced the municipality's electricity bills. If the city simply reduced the hours lights were kept on, lower bills may not be due to LEDs themselves. So, E weakens the mayor's conclusion. A also weakens the argument by suggesting an alternative cause why energy might have been used more efficiently. C also weakens the argument by suggesting that the lower electricity bills may be due to the decreased cost of electricity per unit during that period. B strengthens the mayor's argument by showing a similar occurrence in other municipalities that installed LEDs, strengthening the causal relationship. Thus, B is the right answer.

30. (b)

The given paragraph talks about a rise in the number of digital consultations in India after the pandemic with telemedicine platforms reporting a rise in users from rural areas. I follows directly as the passage says consultations rose exponentially. II follows because the paragraph tells us how BharatNet and eSanjeevani enabled rural participation. Thus, B is the right answer.

III contradicts the warning about uneven healthcare outcomes.
