Topic

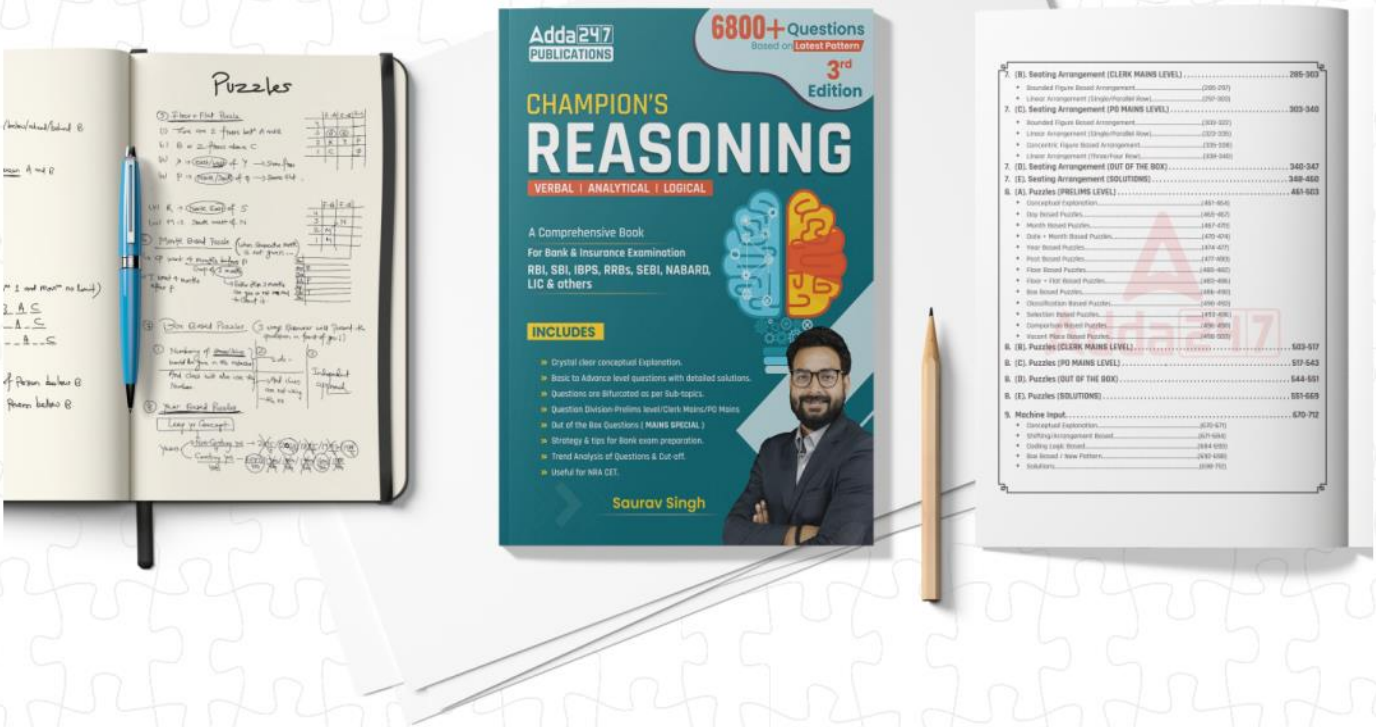
RRB Clerk Mains

BY SAURAV SINGH

CHAMPION'S REASONING 3.0

THIS BOOK INCLUDES

- Crystal clear conceptual Explanation.
- Questions are Bifurcated as per Subtopics.
- Question Division-Prelims Level/Clerk Mains/PO Mains
- Basic to Advance level questions with detailed solutions.
- Strategy & tips for Bank exam preparation.
- Trend Analysis of Questions & Cut-off.
- Out of the Box Questions.



This Book Is Helpful For Both **Prelims** As Well As Your **Mains** Exam Preparation.

A MESSAGE TO STUDENTS

Champions! The Most Crucial Months Are Here…
The upcoming months are going to decide the future of every banking aspirant. With **IBPS Clerk & SBI Clerk (Prelims & Mains) both the phases, IBPS/SBI PO (Mains) phase and of course other major bank exams** are also lined up, this is the time to give your **best shot**.

And we know that, Practice is the bridge between preparation and success.
It is not enough to just learn concepts—you must repeatedly apply them under pressure. Every practice session builds your **speed, accuracy, and presence of mind**, while also reducing exam-day anxiety. Just like a player sharpens skills through daily training before the big match, a banking aspirant must sharpen reasoning, quant, and English through **relentless and structured practice**. The more you practice, the more familiar patterns become, and the more confident you feel when facing new challenges in the exam hall.
Remember: –
📌 *Knowledge* can get you started, but only **consistent practice** turns you into a real achiever.
📌 Practice is not just solving questions, it's about building **speed, accuracy, and confidence**.
📌 Every hour of smart practice today becomes a **step closer to your selection** tomorrow.

And to make your practice even more result-oriented, I'm introducing three powerful add-ons in your updated Rank File:
1️⃣ **Time-Based Miscellaneous Bundled Set –** Carefully designed mixed-topic sets with a timer to replicate real exam pressure, training you to think fast and act smart.
2️⃣ **Timer in Seating + Puzzle File –** Every seating arrangement and puzzle now comes with a built-in timer, ensuring you sharpen your speed, accuracy, and decision-making just like in the actual exam.
3️⃣ **3 Days Mains Files –** Special mains-oriented practice files every 3 days to help you cope with the upcoming PO Mains exam with consistency and confidence.

🎯 Champions, this is not just an update, it's your **weapon to beat the cut-off and secure your seat**. Now it's your turn—make every practice count! 🚀

All The Best Champions
Blessings

Directions (1-5): Read the following information's carefully and answer the questions given below.

Seventeen persons J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, and Z live on different floors in a seven-floor building such that the bottommost floor is numbered as 1, the floor immediately above it is numbered as 2 and so on. At least one and at most four persons live on each floor of the building. The dimensions of all floors are same. Seven of these persons like different colours among Red, Blue, Green, Grey, Yellow, Pink, and Indigo.

X lives two floors above Z, who lives on a prime numbered floor. J, who does not live on an odd numbered floor lives one floor below P. More than one floor is between P's floor and Z's floor. M, who likes Red colour lives on one of the floors above J. More than three persons live above M. R and Q live on one of the floors below Z. As many persons live below Q as above O, who likes Pink colour. The one, who likes Indigo colour lives two floors below O. Total two persons live on the same floor as the one, who likes Indigo. Equal number of persons live on 5th floor and 7th floor. K lives three floors above L, who lives on an odd numbered floor. Total three persons live on the same floor as K's floor. Equal number of persons live on 6th floor and 1st floor. U and V live on the same floor but below K. Z and V live on different floors. J and U live on different floors. L lives on one of the floors below U. The one, who likes Grey colour lives three floors above N. T lives on one of the floors above W, who likes Blue colour. Y does not like Grey colour. The one, who likes Green colour lives one floor below the one, who likes Yellow colour but above K.

1. **Only ___ persons live on both ___ floor and ____ floor.**
   (a) two, 2nd, 5th (b) three, 5th, 7th
   (c) three, 2nd, 6th (d) four, 7th, 5th
   (e) three, 4th, 3rd

2. **Who lives one floor below S?**
   (a) The one, who likes Red colour
   (b) The one, who likes Blue colour
   (c) The one, who likes Green colour
   (d) The one, who likes Yellow colour
   (e) The one, who likes Pink colour

3. **How many persons live between U and Y?**
   (a) As many persons live below N
   (b) As many persons live on 5th floor
   (c) As many persons live above M
   (d) As many persons live on 1st floor
   (e) As many persons live below Z

4. **___ and ___ live on 7th floor and 3rd floor respectively.**
   (a) O, Z (b) T, V
   (c) T, K (d) Y, L
   (e) O, L

5. **Which of the following statements is definitely false?**
   (a) Only Z lives on 2nd floor
   (b) X and K live on the same floor
   (c) Only T and O live on 7th floor
   (d) W lives on an odd numbered floor
   (e) Y lives on one of the floors above N

Directions (6-8): Read the following information's carefully and answer the questions given below.

In every question, some rows are given and to find out the resultant of a particular row you need to follow the following steps in the given order:

Step I: If an even number is followed by a prime number, then the resultant will be the product of both the numbers.

Step II: If an even number is followed by an even number, then the resultant will be addition of the two numbers.

Step III: If an odd number is followed by an even number, then the resultant will be the absolute difference between both the numbers.

Step IV: If an odd number is followed by an odd number, then the resultant will be the smaller number among the two numbers.

Note: If no step is applied, then the resultant will be addition of the two numbers.

6. **What is the quotient when the sum of resultant of Row I and Row II is divided by the resultant of Row II?**
   Row I: 8 11 12 33
   Row II: 31 37 20 44
   Row III: 4 61 9 334
   (a) 13 (b) 5
   (c) 3 (d) 4
   (e) 2

FOR RBI, SBI, IBPS, LIC, NABARD & OTHER BANK/INSURANCE EXAMS
SUBSCRIBE Champion's Reasoning YouTube Channel

7. If X is the resultant of Row I and Y is the resultant of Row II, then which of the following statements is correct regarding resultant of Row III?

Row I: 32 7 15 138
Row II: 78 56 3 4
Row III: 409 Y 5 X

(a) Is an even number
(b) Is more than 9 but less than 15
(c) Is an odd prime number
(d) Is an even prime number
(e) Is more than 15

8. What is the sum of resultant of both rows?

Row I: 18 5 12 3
Row II: 29 31 36 61

(a) 313 (b) 346
(c) 186 (d) 513
(e) 213

9. In the question, assuming the given statements to be true, find which of the conclusion (s) among given three conclusions is/are definitely true and then give your answer accordingly. (Note: Statements and Conclusions are coded as given below)

In a certain code,
'A + B' means A is neither greater nor smaller to B.
'A = B' means A is greater than equal to B.
'A - B' means A is greater than B.
'A * B' means A is smaller than equal to B.
'A ≠ B' means A is smaller than B.

Statements:
C - A + H; H = Q - K * M; M + E = D * L ≠ J

Conclusions:
I. J + K
II. K = J
III. Q ≠ C

(a) Either conclusion I or II is true
(b) Either conclusion I or II and conclusion III is true
(c) All conclusions I, II, and III are true
(d) Only conclusions I and III are true
(e) Only conclusion III is true

10. Statements:
U - V = Z; Y + Z - X; X ≠ Q * D + C; C = F - H

Conclusions:
I. U - X
II. H ≠ D
III. Y * F

(a) Only conclusion II is true
(b) Only conclusions I and II are true
(c) Only conclusions I and III are true
(d) Only conclusions II and III are true
(e) All conclusions I, II, and III are true

Directions (11-14): Read the following information's carefully and answer the questions given below.

A word and number arrangement machine when given an input line of words and numbers rearranges them following a particular rule in each step. The following is an illustration of input and rearrangement.

Input: praise 72 gulf 46 ceremony stand 33 27 combine 67
Step I: ceremony praise 72 gulf 46 stand 33 combine 67 27
Step II: combine ceremony praise 72 gulf 46 stand 67 27 33
Step III: praise combine ceremony 72 gulf stand 67 27 33 46
Step IV: stand praise combine ceremony 72 gulf 27 33 46 67
Step V: gulf stand praise combine ceremony 27 33 46 67 72
Step VI: gvmf subnd psbise cpnbine cfsemony 72 33 64 76 27
Step VII: 19 6 7 19 44 216 99 192 228 81
Step VIII: # @ # # @ @ # @ @ #
Step VIII is the last step of the input.
INPUT: 37 cushion 51 ward 36 behave 89 tends 49 activity

11. In which of the following step 'cushion activity ward' appears in the same order (without any element in between them) ?

(a) Step III (b) Step II
(c) Step IV (d) Step V
(e) There is no such step

12. Which is the difference between the largest number and the lowest number in second last step of the given input after the rearrangement?

(a) 268 (b) 280
(c) 271 (d) 261
(e) 234

FOR RBI, SBI, IBPS, LIC, NABARD & OTHER BANK/INSURANCE EXAMS
SUBSCRIBE Champion's Reasoning YouTube Channel

13. Which of the following is the step of the given input after the rearrangement?
(a) # @ @ # @ # # @ # #
(b) # # @ @ @ # # @ # #
(c) # @ @ @ @ # # @ # @
(d) # @ @ @ @ # @ # # @
(e) None of the above

14. What is the sum of the first number from the left end in Step II and the third number from the right end in Step VI?
(a) 124 (b) 145
(c) 149 (d) 135
(e) None of the above

Directions (15-19): Read the following information's carefully and answer the questions given below.

Nine persons J, K, L, M, N, O, P, Q, and R sit around a circular shaped table. Some of them face towards the centre and remaining face away from the centre. Each of them has different profession among Singer, Dancer, Musician, Police, Painter, Doctor, Engineer, Lawyer and Nurse. The persons whose name starts with consecutive alphabets do not face in the same direction. The distance between two adjacent person is same.

J sits third to the right of the one, who is Lawyer. Only one person sits between J and M. Q sits fourth to the right of M. R sits second to the left of Q. The one, who is Painter sits adjacent to R. The one, who is Painter sits third to the right of N. Only three persons sit between the one, who is Painter and the one, who is Doctor (from either of the sides) . The one, who is Doctor sits second to the left of L, who is not Dancer. The one, who is Singer faces towards the centre. The one, who is Musician sits third to the right of the Singer and faces the same direction as the one, who is Singer. P is not Painter. Only two persons sit between P and the one, who is Dancer (from either of the sides) . The one, who is Engineer sits adjacent to O, who is not Nurse. The one, who is Police does not sit third to the right of the one, who is Musician.

15. Who among the following is Police?
(a) J (b) N
(c) L (d) O
(e) Cannot be determined

16. Which among the following statement(s) is/are true?
(a) R, who is Dancer sits second to the right of the one, who is Singer.
(b) P is Lawyer and sits third to the left of Q.
(c) M, who is Engineer sits second to the left of the one, who is Doctor.
(d) Only one person sits between P and K.
(e) None of the above

17. Who among the following is Nurse?
(a) The one, who sits second to the left of Q.
(b) The one, who sits immediate left of the one, who is Doctor.
(c) The one, who sits third to the left of M.
(d) The one, who sits third to the right of the one, who is Painter.
(e) Both options 'C' and 'D'

18. Who among the following sits third to the right of O?
I. The one, who is Lawyer.
II. Q
III. The one, who sits immediate right of the one, who is Musician.
(a) Only I and II (b) Only I and III
(c) Only II and III (d) Only II

19. Who among the following faces away from the centre?
(a) The one, who is Dancer
(b) The one, who is Police
(c) The one, who is Doctor
(d) The one, who is Nurse
(e) All of the above

20. The question given below consists of two statements numbered I and II given below it. You have to decide whether the data provided in the statements are sufficient to answer the question. Read all the statements and answer the question.

What is the code for 'gift now' in the given code language?

In chain code language,

Statement I: 'now place bottle' is coded as 'bec, red, opl' and 'place jar gift' is coded as 'vbn, opl, cdf'.

Statement II: 'key chain part gift' is coded as 'ghj, cdf, jmn, res' and 'jar tool part' is coded as 'vbn, mes, ghj'.

FOR RBI, SBI, IBPS, LIC, NABARD & OTHER BANK/INSURANCE EXAMS
SUBSCRIBE Champion's Reasoning YouTube Channel

(a) Data given in both statement I and II together are not sufficient to answer the question.
(b) Data given in either statement I alone or II alone is sufficient to answer the question.
(c) Data given in statement I alone is sufficient to answer the question while the data given in statement II alone is not sufficient to answer the question.
(d) Data given in both statement I and II together are necessary to answer the question.
(e) Data given in statement II alone is sufficient to answer the question while the data given in statement I alone is not sufficient to answer the question.

21. The question given below consists of two statements numbered I and II given below it. You have to decide whether the data provided in the statements are sufficient to answer the question. Read all the statements and answer the question.

Six boxes J, K, L, M, N, and O are one above another. Bottommost box is numbered as 1 and the topmost box is numbered as 6. Which among the following box is immediately above J?

Statement I: L is three boxes above K. N is immediately above K. M is two boxes below N.

Statement II: O is above J. O is not adjacent to N.

(a) Data given in both statement I and II together are not sufficient to answer the question.
(b) Data given in either statement I alone or II alone is sufficient to answer the question.
(c) Data given in statement II alone is sufficient to answer the question while the data given in statement I alone is not sufficient to answer the question.
(d) Data given in statement I alone is sufficient to answer the question while the data given in statement II alone is not sufficient to answer the question.
(e) Data given in both statement I and II together are necessary to answer the question.

22. The question given below consists of two statements numbered I and II given below it. You have to decide whether the data provided in the statements are sufficient to answer the question. Read all the statements and answer the question.

Seven persons J, K, L, M, N, O, and P work in the same company. Each person has his shift on one of the days of the same week starting from Sunday. Only one person has his shift on a particular day. Who among the following has his shift on Thursday?

Statement I: Only two persons have their shift between P and L. K has his shift before L. Only three persons have their shift between M and L. L has his shift before Wednesday. O has his shift immediately before L.

Statement II: K has his shift three days before J. P has his shift two days after J. L has his shift just after O. M has his shift after N. N does not have his shift in Sunday.

(a) Data given in both statement I and II together are not sufficient to answer the question.
(b) Data given in either statement I alone or II alone is sufficient to answer the question.
(c) Data given in statement II alone is sufficient to answer the question while the data given in statement I alone is not sufficient to answer the question.
(d) Data given in statement I alone is sufficient to answer the question while the data given in statement II alone is not sufficient to answer the question.
(e) Data given in both statement I and II together are necessary to answer the question.

Directions (23-26): Read the following information's carefully and answer the questions given below.

In an art gallery, eight paintings J, K, L, M, N, O, P and Q are hanging on a wall at certain distance from each other. The paintings are ranked from 1 to 8 according to their price.

Note: Rank 1 is the highest rank and Rank 8 is the lowest rank.

Rank of P is a perfect square number. The number of paintings ranked lower than P is same as the number of paintings ranked higher than M. The painting whose rank is 4 is 7m north of M. M is 4m east of Q. Rank of L is three ranks better than rank of J. Rank of Q is not better than rank of L. J is 8m south of the painting whose rank is 8. O is 15m east of J. O's rank is just lower than K. K is 3m north of L. N is 12m west of K. The painting whose rank is 2 is 10m north of P. Rank 3 painting is not southwest of N.

FOR RBI, SBI, IBPS, LIC, NABARD & OTHER BANK/INSURANCE EXAMS
SUBSCRIBE Champion's Reasoning YouTube Channel

23. In which direction is rank 5 painting with respect to rank 7 painting?
(a) North-west (b) North-east
(c) South-east (d) South-west
(e) South

24. What is the shortest distance between J and K?
(a) 0m (b) 12m
(c) 13m (d) 15m
(e) 11m

25. Which among the following statement/statements is/are true?
I. The painting whose rank is 6 is north-west of P.
II. Rank of K is better than at least three paintings.
III. The shortest distance between P and K is 13m.
IV. N, K and L are to the north-east of Q.
(a) Only I, II and IV (b) Only II and IV
(c) Only III and IV (d) Only I and III
(e) Only II

26. What is the rank of the painting which is north-west of the painting whose rank is 7?
(a) 1 (b) 3
(c) 5 (d) 2
(e) 4

27. In the question below, there are four statements followed by two conclusions in each option. You have to take the four given statements to be true even if they seem to be at variance from commonly known facts and then decide in which of the given options both the conclusions are true disregarding the commonly known facts.
Statements:
All Gold is Metal
All Metal is Alloy
Only a few Metal is Ore
Every Ore is Mineral
Conclusions:
(a) Some Mineral are Alloy. No Gold is Ore.
(b) Some Ore is not Gold. Some Metal is Mineral.
(c) Some Mineral is not Alloy. Some Ore is not Metal.
(d) Some Metal is Mineral. Some Ore is Alloy.
(e) None of the above

28. In the question below, there are four statements followed by two conclusions in each option. You have to take the four given statements to be true even if they seem to be at variance from commonly known facts and then decide in which of the given options both the conclusions are true disregarding the commonly known facts.
Statements:
Only Mouse is Hamster
Some Mouse is Beaver
All Beaver is Vole
No Beaver is Mole
Conclusions:
(a) No Mouse is Mole. No Hamster is Beaver.
(b) Some Vole is not Mole. All Mouse can never be Vole.
(c) No Hamster is Mole. No Mole is Mouse.
(d) Both options 'B' and 'C'
(e) All options 'A', 'B' and 'C'

29. In the given words, if from the left end the 2nd and 5th letters are changed to 3rd preceding letter as per English alphabetical series and same is done with 6th and 9th letters, then which series would form an English meaningful word after rearrangement?
I. MXNUVFRIST
II. CRNTULBUWE
III. OXTPHUFOOM
(a) Only I and III (b) Only II
(c) Only II and III (d) Only I and II
(e) All I, II and III

30. If 2nd digit from the left end of each number from each group is to be considered, then which among the following group of digits can make at least one number, when taken in order from right to left, in which the sum of first two digits from left end is a multiple of last digit from the left end?
I. 2357, 7476, 6532
II. 8219, 3142, 9723
III. 8956, 4612, 4478
IV. 7945, 6578, 5834
(a) Only I and III (b) Only I
(c) Only III and IV (d) Only I and II
(e) Only III

Solutions

Solutions (1-5)

1) X lives two floors above Z, who lives on a prime numbered floor.
2) J, who does not live on an odd numbered floor lives one floor below P. More than one floor is between P's floor and Z's floor.
3) M, who likes Red colour lives on one of the floors above J.
4) More than three persons live above M.

From clue 1, Z lives on 2nd floor, 3rd floor or 5th floor and X lives on 4th floor, 5th floor or 7th floor.
From clue 2, P lives on either 7th floor or 5th floor and J lives on either 6th floor and 4th floor.
From clues 3 and 4, Z lives on 2nd floor, M lives on either 5th floor or 6th floor and at most eight persons live above M as at most four persons live in each floor of the building.
Case 1: When M lives on 5th floor.

Floor Numbers	Persons
7	
6	
5	P, M (Red)
4	X, J
3	
2	Z
1	

Case 2: When M lives on 6th floor.

Floor Numbers	Persons
7	___, ___, ___, ___
6	M (Red)
5	P
4	X, J
3	
2	Z
1	

From clues 1 and 2, in both the cases Q and R live on 1st floor and O lives on 7th floor.
From clues 3 and 4, in case 1, P likes Indigo and only two persons lives on 5th floor. In case 2, either P likes Indigo or one other person, who lives on 5th floor likes Indigo and only two persons live on 5th floor.
From clue 5, case 2 will be eliminated as only two persons live on 7th floor. In case 1, only two persons live on 7th floor and two, three or four persons live on 6th floor.
Case 1: When M lives on 5th floor.

Floor Numbers	Persons
7	O (Pink) , ___
6	
5	P (Indigo) , M (Red)
4	X, J
3	
2	Z
1	R, Q

1) K lives three floors above L, who lives on an odd numbered floor.
2) Total three persons live on the same floor as K's floor.

FOR RBI, SBI, IBPS, LIC, NABARD & OTHER BANK/INSURANCE EXAMS
SUBSCRIBE Champion's Reasoning YouTube Channel

3) Equal number of persons live on 6th floor and 1st floor.
4) U and V live on the same floor but below K. Z and V live on different floors. J and U live on different floors. L lives on one of the floors below U.
5) The one, who likes Grey colour lives three floors above N.
6) T lives on one of the floors above W, who likes Blue colour. Y does not like Grey colour. The one, who likes Green colour lives one floor below the one, who likes Yellow colour but above K.
From clue 1, K lives on either 6th floor or 4th floor and L lives on either 1st or 3rd floor.
From clues 2 and 3, either only three persons or only four persons live on 6th floor and 1st floor.
From clues 4 and 5, U, V, and N lives on 3rd floor and the one, who likes Grey colour lives on 6th floor.
Only three persons live on 3rd floor and only one person lives on 2nd floor.
From clue 6, T likes Yellow colour and lives on 7th floor, S likes Grey colour and lives on 6th floor. W lives on 6th floor and Y likes Green colour.
The final arrangement is as follows:

Floor Numbers	Persons
7	O (Pink) , T (Yellow)
6	S (Grey) , W (Blue) , Y (Green)
5	P (Indigo) , M (Red)
4	X, J, K
3	U, V, N
2	Z
1	R, Q, L

1. (e) 2. (a) 3. (c) 4. (b) 5. (d)

Solutions (6-8)

6. (e)
Given:
Row I: 8 11 12 33
Row II: 31 37 20 44
Row III: 4 61 9 332
In Row I: 8 11 12 33
8 is followed by 11, so product = (8 X 11) = 88
88 is followed by 12, so sum = (88 + 12) = 100
100 is followed by 33, so sum = (100 + 33) = 133
So, resultant of Row I is 133.
In Row II: 31 37 20 44
31 is followed by 37, so smaller number is 31.
31 is followed by 20, so absolute difference = I31 - 20I = 11
11 is followed by 44, so absolute difference = I44 - 11I = 33
So, resultant of Row II is 33.
In Row III: 4 61 9 334
4 is followed by 61, so product = (4 X 61) = 244
244 is followed by 9, so sum = (244 + 9) = 253
253 is followed by 334, so absolute difference = I334 - 253I = 81
So, resultant of Row III is 81.
Resultant of Row I = 133
Resultant of Row II = 33
Resultant of Row III = 81
So, required quotient = (133 + 33) ÷ 81 = 2
Hence, option e.

Reasoning By Saurav Sir

SUBSCRIBE Champion's Reasoning YouTube Channel

7. (c)
Given:
Row I: 32 7 15 138
Row II: 78 56 3 4
Row III: 409 Y 5 X
In Row I: 32 7 15 138
32 is followed by 7, so product = (32 X 7) = 224
224 is followed by 15, so sum = (224 + 15) = 239
239 is followed by 138, so absolute difference = I239 - 138I = 101
So, resultant of Row I is 101.
In Row II: 78 56 3 4
78 is followed by 56, so sum = (78 + 56) = 134
134 is followed by 3, so product = (134 X 3) = 402
402 is followed by 4, so sum = (402 + 4) = 406
So, resultant of Row II is 406.
In Row III: 409 406 5 101
409 is followed by 406, so absolute difference = I409 - 406I = 3
3 is followed by 5, so smaller number is 3.
3 is followed by 101, so smaller number is 3.
So, resultant of Row III is 3.
Among the given statements, 'Is an odd prime number' is correct regarding resultant of Row III.
Hence, option c.

8. (a)
Given:
Row I: 18 5 12 3
Row II: 29 31 36 61
In Row I: 18 5 12 3
18 is followed by 5, so product = (18 X 5) = 90
90 is followed by 12, so sum = (90 + 12) = 102
102 is followed by 3, so product = (102 X 3) = 306
So, resultant of Row I is 306.
In Row II: 29 31 36 61
29 is followed by 31, so smaller number is 29.
29 is followed by 36, so absolute difference = I36 - 29I = 7
7 is followed by 61, so smaller number is 7.
So, resultant of Row II is 7.
So, the sum of resultant of both rows = (306 + 7) = 313
Hence, option a.

9. (e)
Given Equation: 'C - A + H; H = Q - K * M; M + E = D * L ≠ J'.
After decoding the signs of the given statement, we get,
C > A = H; H ≥ Q > K ≤ M; M = E ≥ D ≤ L < J
After combining, we get: C > A = H ≥ Q > K ≤ M = E ≥ D ≤ L < J
Conclusions:
I. J + K means J = K: False (As, K ≤ M = E ≥ D ≤ L < J, here the relation between J and K can't be determined)
II. K = J means K ≥ J: False (As, K ≤ M = E ≥ D ≤ L < J, here the relation between K and J can't be determined)
III. Q ≠ C means Q < C: True (As, C > A = H ≥ Q, here C > Q)
Therefore, only conclusion III is true.
Hence, option e.

10. (b)

Given Equation: 'U - V = Z; Y + Z - X; X ≠ Q * D + C; C = F - H'

After decoding the signs of the given statement, we get,

U > V ≥ Z; Y = Z > X; X < Q ≤ D = C; C ≥ F > H

After combining, we get: U > V ≥ Y = Z > X < Q ≤ D = C ≥ F > H

Conclusions:

I. U - X means U > X: True (As, U > V ≥ Y = Z > X, here, U > X)

II. H ≠ D means H < D: True (As, D = C ≥ F > H, here D > H)

III. Y * F means Y ≤ F: False (As, Y = Z > X < Q ≤ D = C ≥ F, here the relation between Y and F can't be determined)

Therefore, only conclusions I and II are true.

Hence, option b.

Solutions (11-14)

The rearrangement takes place in the following ways:

In step I to Step V: In each step, a number is rearranged to the extreme right end and a word is rearranged to the extreme left end.

For numbers: The numbers are arranged in ascending order.

For words: The words are arranged as per the number of letters in the word in descending order.

In Step VI:

For Numbers: Position of digits of each number is interchanged.

For words: The 2nd letter and 3rd letter from the left end of each word are replaced with its immediate succeeding letter as per the English alphabetical series.

In step VII:

For numbers: Each number is multiplied by 3.

For words: Each word is replaced by the sum of its 3rd letter and last letter from the left end.

In step VIII: All the odd numbers are replaced by '#' symbol and all the even numbers are replaced by '@' symbol.

Input: 37 cushion 51 ward 36 behave 89 tends 49 activity

Step I: activity 37 cushion 51 ward behave 89 tends 49 36

Step II: cushion activity 51 ward behave 89 tends 49 36 37

Step III: behave cushion activity 51 ward 89 tends 36 37 49

Step IV: tends behave cushion activity ward 89 36 37 49 51

Step V: ward tends behave cushion activity 36 37 49 51 89

Step VI: wbsd tfods bfiave cvthion aduivity 63 73 94 15 98

Step VII: 23 34 14 34 46 189 219 282 45 294

Step VIII: # @ @ @ @ # # @ # @

11. (c) 12. (b) 13. (c) 14. (b)

Solutions (15-19)

As, we know that the persons whose name starts with consecutive alphabets do not face in the same direction. So, we have two cases for the direction:

First when J faces towards the centre.

J	K	L	M	N	O	P	Q	R
In	Out	In	Out	In	Out	In	Out	In

Second, when J faces away from the centre.

J	K	L	M	N	O	P	Q	R
Out	In	Out	In	Out	In	Out	In	Out

1) J sits third to the right of the one, who is Lawyer.

FOR RBI, SBI, IBPS, LIC, NABARD & OTHER BANK/INSURANCE EXAMS
SUBSCRIBE Champion's Reasoning YouTube Channel

2) Only one person sits between J and M.
3) Q sits fourth to the right of M.
4) R sits second to the left of Q.

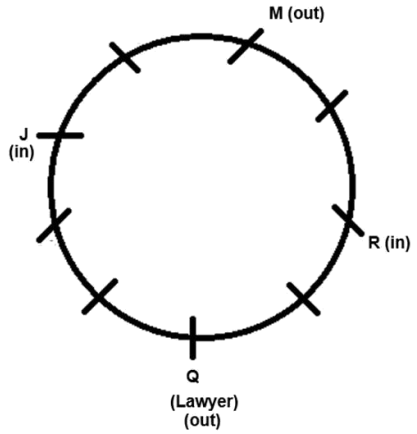
From clue 1, we have two cases. First when the one, who is Lawyer face away from the centre. Second when the one, who is Lawyer faces towards the centre. Thus, J sits third to the right of the one, who is Lawyer.

From clue 2, M sits either second to the left or second to the right of J.

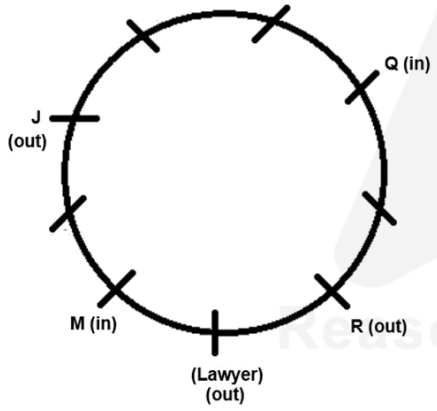
From clues 3 and 4, in case 1.a and case 2.b, we get M and Q face away from the centre thus J and R face towards the center. In case 1.b and case 2.a, M and Q face towards the centre thus R and J face away from the center. Also, in case 1.a and 1.b, M sits second to the left of J and R sits second to the right of M. In case 2.a and 2.b, Q sits third to the right of J and R sits second to the right of M.

Case 1: When the one, who is Lawyer faces away from the centre.

Case 1.a: When M faces away from the centre.

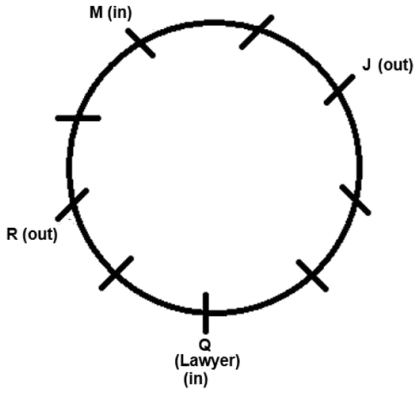


Case 1.b: When M faces towards the centre.

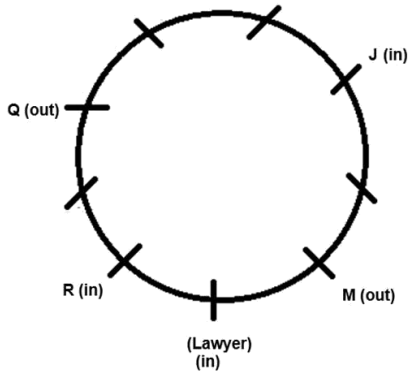


Case 2: When the one, who is Lawyer faces towards the centre.

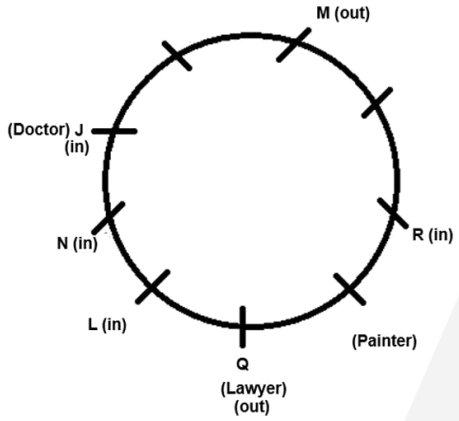
Case 2.a: When M faces towards the centre.



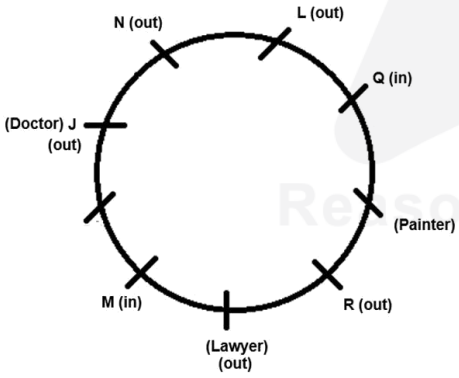
Case 2.b: When M faces away from the centre.



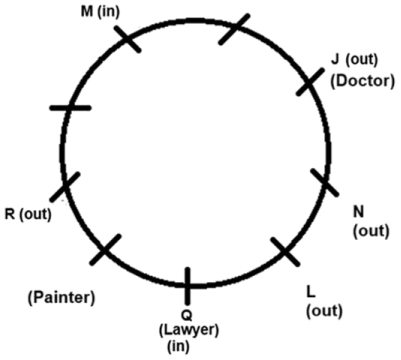
From clues 1 and 2, in case 1.a and case 1.b, the one, who is Painter sits immediate left of R and N sits immediate right of J. In case 2.a and case 2.b, the one, who is Painter sits immediate left of Q and N sits immediate right of J.
From clues 3 and 4, in all the cases J is Doctor thus L sits second to the right of J.
Case 1: When the one, who is Lawyer faces away from the centre.
Case 1.a: When M faces away from the centre.



Case 1.b: When M faces towards the centre.

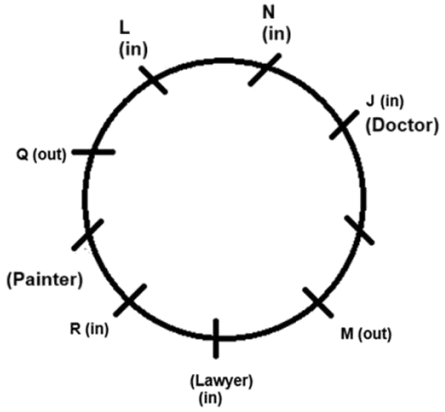


Case 2: When the one, who is Lawyer faces towards the centre.
Case 2.a: When M faces towards the centre.



Reasoning By Saurav Sir

Case 2.b: When M faces away from the centre.

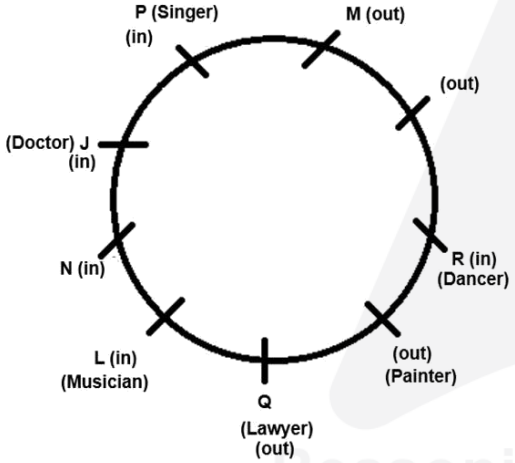


From clues 1 and 2, we get the one, who is Singer and the one, who is Musician both face towards the centre. In case 1.b and case 2.b, we cannot place the one, who is Singer and the one, who is Musician so these cases get eliminated.

From clues 2 and 3, we know in case 1.a and case 2.a, as we know only K, P and O are left, while K and O face away from the centre; P faces towards the centre. In case 1.a, P sits immediate left of J, P is Singer, L is Musician and R is Dancer. In case 2.a, P is Lawyer, L is Singer, R is Musician and Q is Dancer.

Case 1: When the one, who is Lawyer faces away from the centre.

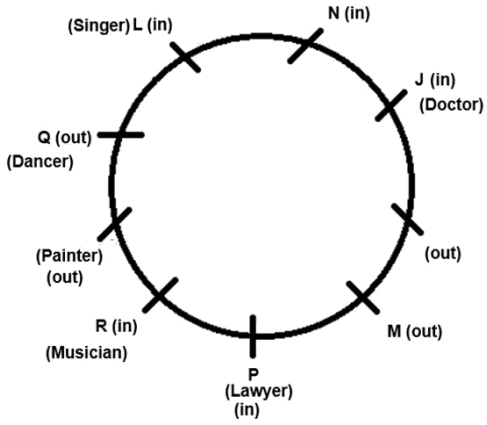
Case 1.a: When M faces away from the centre.



Reasoning By Saurav Sir

Case 2: When the one, who is Lawyer faces towards the centre.

Case 2.b: When M faces away from the centre.



From clue 1, in both the cases M is Engineer. O is Police and N is Nurse.

From clue 2, case 2.b gets eliminated.

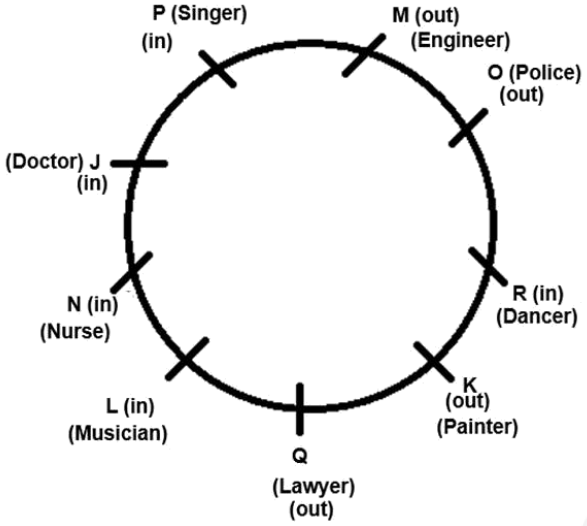
Therefore, the final arrangement is as follows:



15. (d) 16. (c) 17. (e) 18. (e) 19. (b)

Solutions (20-22)

20. (a)

From statement I alone, 'now place bottle' is coded as 'bec, red, opl' and 'place jar gift' is coded as 'vbn, opl, cdf' we get:

The code for 'place' in the given code language is 'opl'

The code for 'now' and 'bottle' in the given code language is 'bec' and 'red', however not necessarily in the same order.

The code for 'jar' and 'gift' in the given code language is 'vbn' and 'cdf', however not necessarily in the same order.

So, from statement I alone, we cannot determine the code for the word 'gift now' in the given code language.

From statement II alone, 'key chain part gift' is coded as 'ghj, cdf, jmn, res' and 'jar tool part' is coded as 'vbn, mes, ghj' we get:

The code for 'part' in the given code language is 'ghj'

The code for 'key', 'chain' and 'gift' in the given code language is 'res', 'jmn' and 'cdf', however not necessarily in the same order.

The code for 'jar' and 'tool' in the given code language is 'vbn' and 'mes', however not necessarily in the same order.

So, from statement II alone, we cannot determine the code for the word 'gift now' in the given code language.

On combining both the statement together, we get:

The code for 'gift' in the given code language is 'cdf'.

The code for 'jar' in the given code language is 'vbn'.

The code for 'tool' in the given code language is 'mes'.

The codes for 'now' and 'bottle' in the given code language is 'bec' and 'red', however not necessarily in the same order.

The code for 'key', and 'chain' in the given code language is 'res', and 'jmn' however not necessarily in the same order.

So, from statement I and II together, we cannot determine the code for the word 'gift now' in the given code language.

Therefore, data given in both statement I and II together are not sufficient to answer the question.

Hence, option a.

21. (e)

From statement I alone, L is three boxes above K. N is immediately above K. M is two boxes below N. We get:

Case 1: When L is 6th box.

Box number	Box
6	L
5	O/J
4	N
3	K
2	M
1	J/O

Case 2: When L is 5th box.

Box number	Box
6	O/J
5	L
4	J/O
3	N
2	K
1	M

So, from statement I alone, we cannot fix J in the arrangement.

From statement II alone, O is above J. O is not adjacent to N. We get:

So, from statement II alone, no fixed arrangement can be formed.

On combining, statements I and II together, we get:

Box number	Box
6	O
5	L
4	J
3	N
2	K
1	M

So, on combining both the statements I and II together, we get L is immediately above J.

Therefore, data given in both statement I and II together are necessary to answer the question.

Hence, option e.

22. (c)

From statement I alone, only two persons have their shift between P and L. K has his shift before L. Only three persons have their shift between M and L. L has his shift before Wednesday. O has his shift immediately before L. We get:

Day	Person
Sunday	K
Monday	O
Tuesday	L
Wednesday	J/N
Thursday	N/J
Friday	P
Saturday	M

FOR RBI, SBI, IBPS, LIC, NABARD & OTHER BANK/INSURANCE EXAMS
SUBSCRIBE Champion's Reasoning YouTube Channel

So, from statement I alone, we cannot answer the above question.
Therefore, data given in statement I alone is not sufficient to answer the question.
From statement II alone, K has his shift three days before J. P has his shift two days after J. L has his shift just after O. M has his shift after N. N does not have his shift in Sunday. We get:

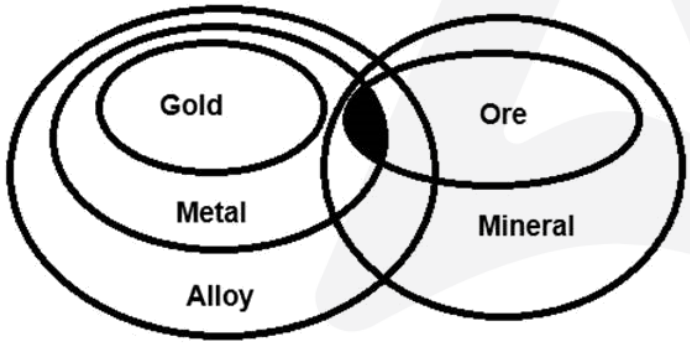
Day	Person
Sunday	K
Monday	O
Tuesday	L
Wednesday	J
Thursday	N
Friday	P
Saturday	M

So, from statement II alone, we get N has his shift on Thursday.
Therefore, data given in statement II alone is sufficient to answer the question.
So, data given in statement II alone is sufficient to answer the question while the data given in statement I alone is not sufficient to answer the question.
Hence, option c.

Solutions (23-26)

23. (c) 24. (d) 25. (e) 26. (d)

27. (d)
Following figure can be formed:



In option 'A':
I. Some Mineral are Alloy: Follows (As, only a few Metal are Ore, all Metal are Alloy, Every Ore are Mineral, so some Mineral which are Ore are also Alloy)
II. No Gold is Ore: Does not follow (As, there is no direct relation between Gold and Ore, so no definite conclusion follows)
In option 'B':
I. Some Ore is not Gold: Does not follow (As, there is no direct relation between Gold and Ore, so no definite conclusion follows)
II. Some Metal is Mineral: Follows (As, only a few Metal are Ore, all Metal are Alloy, Every Ore are Mineral, so some Metal which are Ore are also Mineral)
In option 'C':
I. Some Mineral is not Alloy: Does not follow (As, only a few Metal are Ore, all Metal are Alloy, Every Ore are Mineral, so some Mineral could or could not be Alloy)
II. Some Ore is not Metal: Does not follow (As, only a few Metal is Ore, so all Ore can be Metal)
In option 'D':

Reasoning By Saurav Sir

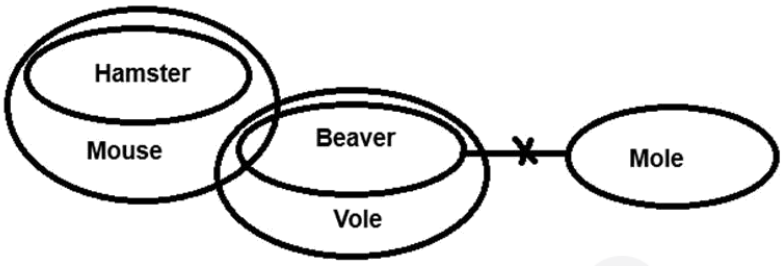
I. Some Metal is Mineral: Follows (As, only a few Metal are Ore, all Metal are Alloy, Every Ore are Mineral, so some Metal which are Ore are also Mineral)
II. Some Ore is Alloy: Follows (As, every Ore is Mineral, only a few Metal is Ore, all Metal is Alloy, so some Ore which are Metal are also Alloy)
Hence, option d.

28. (b)
Following figure can be formed:



In option 'A':
I. No Mouse is Mole: Does not follow (As, there is no direct relation between Mouse and Mole, so, no Mouse is Mole does not follow)
II. No Hamster is Beaver: Follows (As, only Mouse are Hamster, so Hamster can never be any other element)
In option 'B':
I. Some Vole is not Mole: Follows (As, all Beaver are Vole, no Beaver is Mole, some Vole which are Beaver can never be Mole)
II. All Mouse can never be Vole: Follows (As, only Mouse are Hamster, so some Mouse which are Hamster can never be any other element)
In option 'C':
I. No Hamster is Mole: Follows (As, only Mouse are Hamster, so Hamster can never be any other element)
II. No Mole is Mouse: Does not follow (As, there is no direct relation between Mole and Mouse, so no definite conclusion follows)
Hence, option b.

29. (b)
Given word:
Given: I. MXNUVFRIST
After changing 2nd, 5th, 6th and 9th letter to 3rd preceding letter we get:

1	2	3	4	5	6	7	8	9	10
M	X	N	U	V	F	R	I	S	T
	-3			-3	-3			-3	
M	U	N	U	S	C	R	I	P	T

'MUNUSCRIPT' is not an English meaningful word.
II. CRNTULBUWE
After changing 2nd, 5th, 6th and 9th letter to 3rd preceding letter we get:

1	2	3	4	5	6	7	8	9	10
C	R	N	T	U	L	B	U	W	E
	-3			-3	-3			-3	
C	O	N	T	R	I	B	U	T	E

'CONTRIBUTE' is an English meaningful word.
III. OXTPHUFOOM

Reasoning By Saurav Sir

FOR RBI, SBI, IBPS, LIC, NABARD & OTHER BANK/INSURANCE EXAMS
SUBSCRIBE Champion's Reasoning YouTube Channel

After changing 2nd, 5th, 6th and 9th letter to 3rd preceding letter we get:

1	2	3	4	5	6	7	8	9	10
O	X	T	P	H	U	F	O	O	M
	-3			-3	-3			-3	
O	U	T	P	E	R	F	O	L	M

'OUTPERFOLM' is not an English meaningful word.
So, only II would form an English meaningful word after rearrangement.
Hence, option b.

30. (d)
In group I: 2357, 7476, 6532
The 2nd digit of given numbers from the left end are '3', '4' and '5', which makes '543' when, taken in order from right to left, the sum of (5 + 4) = 9, which is a multiple of 3.
In group II: 8219, 3142, 9723
The 2nd digit of given numbers from the left end are '2', '1' and '7', which makes '712' when, taken in order from right to left, the sum of (7 + 1) = 8, which is a multiple of 2.
In group III: 8956, 4612, 4478
The 2nd digit of given numbers from the left end are '9', '6' and '4', which makes '469' when, taken in order from right to left, the sum of (4 + 6) = 10, which is not a multiple of 9.
In group IV: 7945, 6578, 5834
The 2nd digit of given numbers from the left end are '9', '5' and '8', which makes '859' when, taken in order from right to left, the sum of (8 + 5) = 13, which is not a multiple of 9.
Only I and II will make a number, when taken in order from right to left, in which the sum of first two digits from left end is a multiple of last digit from the left end.
Hence, option d.
